ABSTRACT

Freelancing is a rapidly growing phenomenon in today's digital world, where individuals can work remotely and independently on various projects for multiple clients. One of the fastest-growing industries in the world, freelancing generates more than \$1.5 trillion in income annually. On a global scale, more than 77 million people say that freelancing is their principal source of income.

The fundamental structure and service model of the freelancing platforms has largely remained the same, despite the fact that the vast bulk of freelance work occurs on digital platforms.

Almost all traditional freelancing networks suffer from an inherent issue in the basic model of a freelancing model, and this impacts the overall performance of the platform as well but we are going to change all the existing traditional ways by using cryptocurrency as a payment method.

This paper explores the concept of freelancing with the combination of blockchain technology as using cryptocurrency as a payment method also, its advantages, and the importance of our platforms available for freelancers to find work. The paper also delves into the skills and qualities required to succeed in the freelancing industry and the challenges that freelancers may face. Additionally, the paper discusses the impact of freelancing along with blockchain technology and how it is changing the way businesses operate. Overall, the paper highlights the significance of cryptocurrency and blockchain development in freelancing and its role in shaping the future of work.

INTRODUCTION

ChainTusker is a decentralized task marketplace that aims to challenge the traditional freelancing industry by leveraging the power of blockchain technology. As a platform run and controlled by the ChainTusker team, we connect skilled professionals with job opportunities in the fields of freelancing, outsourcing services, and software marketplace. Our platform boasts thousands of expert freelancers who specialize in various fields, including software development, graphic design, and more.

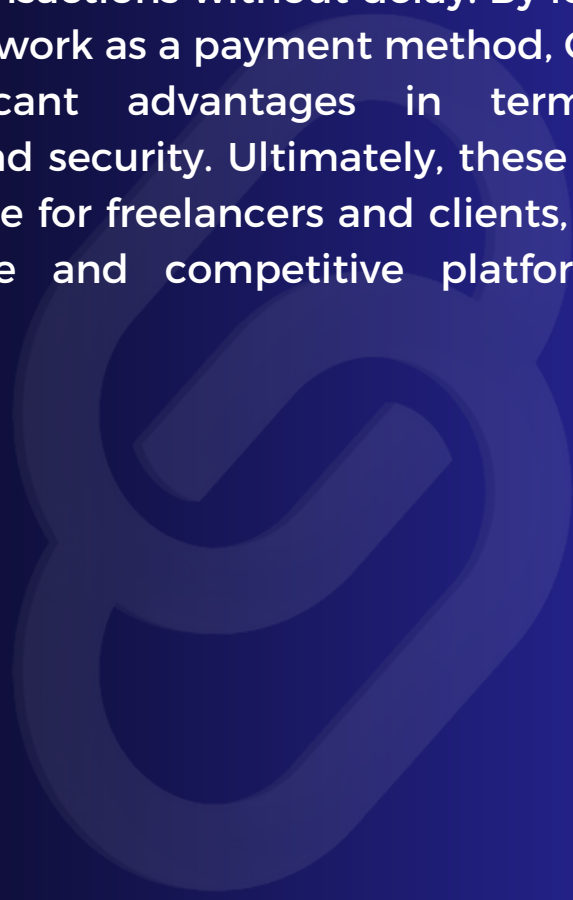

At ChainTusker, we offer a wide range of services related to web design, UI/UX design, logo design, mobile app design, and much more. Our primary goal is to introduce a freelance market that accepts Matic as a cryptocurrency and payment method, in addition to fiat money. With ChainTusker, freelancers can enjoy a plethora of benefits such as faster transactions, lower transaction fees, enhanced security, and more control over their funds.

By using digital currency as a payment method, freelancers can receive payments in real-time, which significantly reduces the transaction costs associated with traditional payment methods. Furthermore, our secure and transparent ledger system ensures that freelancers are paid fairly and promptly, without any intermediary interference.

At ChainTusker, we strive to revolutionize the way freelancers conduct their businesses on freelance marketplaces. We provide unparalleled speed, security, and control over their earnings, making us a game-changer for the freelancing industry. We are confident that our platform will empower freelancers to achieve their full potential, and we are excited to be at the forefront of this exciting new era in the world of freelancing.

WHY POLYGON?

The Polygon network offers fast transaction confirmation times that can greatly enhance the user experience for freelancers and clients. With confirmation times as low as a few seconds, transactions on the network can be processed quickly, making it easier for users to complete their transactions without delay. By leveraging the benefits of the Polygon network as a payment method, Chain Tusker can offer its users significant advantages in terms of speed, cost, interoperability, and security. Ultimately, these benefits can improve the user experience for freelancers and clients, making Chain Tusker a more attractive and competitive platform in the freelance marketplace.

ISSUES TO BE SOLVED

High Commission:

High commission rates are a significant problem for freelancers as they can significantly reduce their earnings. Many freelance platforms charge fees to both freelancers and clients, with some platforms charging up to 20% or more in commission fees. These fees can add up quickly, particularly for lower-paid freelance work. This not only affects the freelancer's income but can also discourage potential clients from using these platforms to hire freelancers, as they may be deterred by the high commission rates.

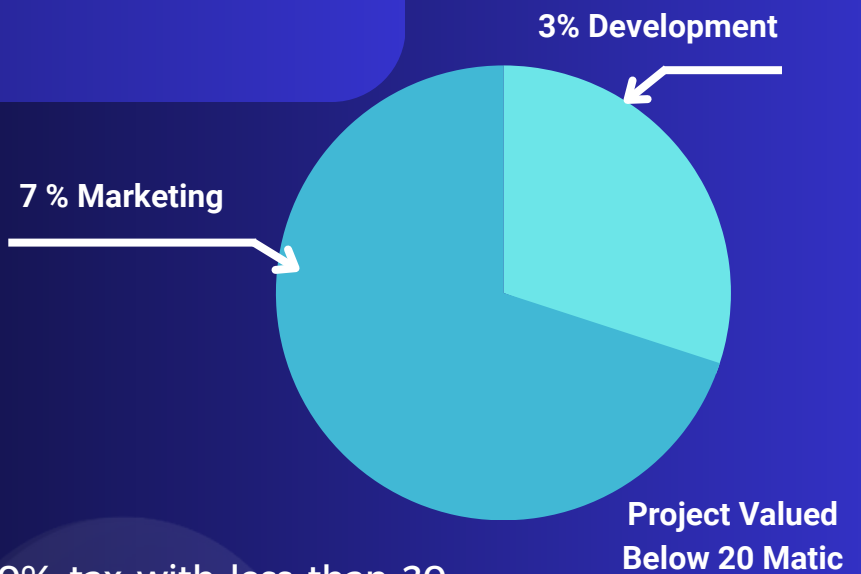

Flawed Dispute Resolution

Not all freelancing projects get completed smoothly, and many projects end up in a dispute where clients and freelancers are not in agreement. In this kind of scenario, where clients and freelancers dispute over the quality of work or payment, most freelancing websites offer some form of the dispute resolution process. The issue with these dispute resolution approaches is that they are designed to favour the clients significantly more than freelancers.

Intense Competition in Old Marketplaces

Intense competition is another problem facing the old existing freelance markets. This can make it challenging for new freelancers to establish themselves, as there are many established and experienced freelancers competing for the same work. In addition, clients have more options to choose from, and they may be more likely to hire freelancers who have a proven track record and established reputation. This can make it difficult for new freelancers to build a portfolio and gain the necessary experience to become successful in their field.

OUR INNOVATIVE SOLUTION

Low Fees:

There is a provision of around 10% tax with less than 20 Matic price projects from which 3% will use for development and 7% for marketing, and 12% tax on more than 20 Matic value project from which 4% will be used for development and 8% for marketing. Our decentralized freelance market ecosystem lowers fees by directly connecting Clients and Freelancers P2P.

Decentralized Mechanism

Our company policies are not decided by a single authority team there is a complete panel of moderators who resolve issues without being biased. We will provide greater autonomy and control for both freelancers and clients, as they are able to negotiate their own terms and conditions without the restrictions imposed by traditional freelance marketplaces.

Fair Dispute Settlements:

The subjectivity of work on a freelancing platform often calls for discrepancies in opinions and settlements of disputes. A typical freelancing platform does not guarantee such settlements. The dispute settlements often involve surplus arbitration costs and unfavourable binding decisions, which may not be in the best interest of a freelancer. On Flash Tusker every thing will go with full rue and regulations.

MISSION

Chain Tusker is a modern concept marketplace that offers an innovative approach to payment and transaction processing. With its focus on faster transaction times and lower fees, the platform aims to provide a convenient and cost-effective payment solution to its users. At Chain Tusker, our client security is a top priority, and the platform takes measures to ensure the safety and protection of its users' data and transactions. The platform implements robust encryption and authentication protocols, and it has a system in place to handle any data tampering or hacking attempts.

As a blockchain-based platform, Chain Tusker operates without the need for centralized entities. This trustless architecture not only gives confidence to the users but also ensures that no one can set exorbitant fees, as seen on traditional freelance platforms and work providers. Chain Tusker aims to foster a sense of community among its users, offering forums, chat rooms, and other social features that allow freelancers and clients to connect and collaborate on projects. The platform also offers educational resources and support to help freelancers improve their skills, learn new tools and techniques, and stay up-to-date with the latest industry trends and best practices.

To ensure a fair and transparent marketplace, Chain Tusker establishes clear guidelines and pricing structures that benefit both freelancers and clients, ensuring that both parties receive fair compensation for their work. By prioritizing security, convenience, and community building, Chain Tusker seeks to provide a superior freelance platform experience for its users.

FREELANCE MARKET PLACE

Chain Tusker is a groundbreaking platform that comes up with the greatest way to create economic opportunities that empower individuals or organizations to improve their lives and futures. At Chain Tusker, we provide a user-friendly interface that enables sellers and buyers to easily log in with OTP and generate their wallets. Our platform serves as an ideal place for businesses to create project requirements by filling out a form and attaching essential documents, which can then be posted after setting a budget. This feature is especially useful for freelancers who can access all the available projects on a single page and use filters, including budget and niche, to place bids on projects that align with their expertise. In addition to all these exciting features, we offer an extra perk for our users. You can easily convert your fiat money into cryptocurrencies by using your credit card, Apple Pay, or Google Pay directly.

UNLOCK YOUR POTENTIAL

ChainTusker is an innovative platform that provides a seamless and transparent experience for users when it comes to managing their earnings and expenses. With our state-of-the-art backend system, all your financial details will be securely stored in the dashboard for your convenience. You will also receive timely notifications, similar to those provided by popular platforms like Fiverr. We understand the importance of maintaining a safe and reliable marketplace, which is why we have implemented a user-friendly feature that allows you to report spam or fraudulent profiles and projects. This ensures that the community stays free from any illicit activities and maintains its integrity. At ChainTusker, we recognize the efforts of our hardworking freelancers and reward them by displaying the most popular and in-demand freelancers on our trending page. We utilize the power of blockchain technology to ensure the smooth and efficient management of transactions on our platform. Our smart contract feature streamlines the entire process, making it secure, fast, and hassle-free.

TAXES & CONFLICT RESOLVE

Our project implements a tiered taxation system, with a 10% tax on project values under \$20, with 3% dedicated to the development and 7% to marketing. For values exceeding \$20, a 12% tax will be applied, with 4% allocated to development and 8% to marketing. While we currently use the Dollar as our currency, we will update users if we transition to USDT or MATIC. In the event of conflicts, our moderators from the help section will serve as mediators to hear out both parties and decide on whether to release or refund payments. Additionally, a chat application will be available to users for streamlined communication.

How We Protect Your Information

Our system leverages a hybrid architecture, blending the benefits of web 2.0 and web 3.0 technologies. By utilizing Smart Contracts, we ensure the secure management of transactions, while our fast servers provide robust processing power. Data authenticity is maintained through hashed copies of user information stored in the Smart Contract. For example, user profile information is converted to a hash and stored in the Smart Contract, enabling our servers to identify any tampering and alert users. Our innovative approach delivers a powerful and reliable system for managing sensitive information. **ChainTusker is not just any other platform for freelancers and businesses, it is the future of freelancing. Get ready to uplift your financial journey with Chaintusker.**

TRANSACTIONS FLOW

The order and transaction flow of smart contracts on the blockchain involves a series of well-defined steps to ensure a smooth and secure execution of the contract. The process starts with the buyer posting a project and inviting sellers to bid on the project with their quotations. Once the bids are received, the buyer will select a seller to assign the project. At this stage, the buyer needs to make the payment, which will be held within the smart contract via an escrow payment system until the work is completed. As the seller completes the milestones or the entire project, they will mark the work as completed and request approval from the buyer. The buyer has up to three days to approve or reject the milestone request; otherwise, it will be automatically approved. Finally, when the buyer approves the milestone, the funds will be transferred instantly to the seller's wallet. This process ensures that both parties are protected, and the smart contract executes efficiently, securely, and transparently.

ROADMAP

Launch

18 April 2023

We will launch a Beta version for testing that is essential part of launching of new platform with goal of 10000 Registered users along consulting VCs for possible funding and getting more partnerships.

User Registrations

Juy - September

We will almost reach 50000 user registrations by having our own secure server to ensure millions of visitors on our website.

Becoming unicorn

October - December

Our initial goal at this time is to work day and night and be a Unicorn Marketplace having Billion Dollar valuations till April 2024

Media Marketing

October - December

We will start media marketing on different platforms to reach more and more audiences like TuneIn, Sirius XM, Hulu, and Netflix.

New Feature

23 December to April 24
